the ecosystem concept in natural resource management 1. Introduction1.1. A broadly operational concept despite a lack of unity. A number of wide scale assessments have taken place to assess the status and trends of the world's ecosystem services " including the Millennium Ecosystem Assessment (), The Economics of Ecosystems and Biodiversity (), and the assessments of the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem ...

Navigating pluralism: Understanding perceptions of the

the ecosystem concept in natural resource management An ecosystem is a community of living organisms in conjunction with the nonliving components of their environment, interacting as a system. These biotic and abiotic components are linked together through nutrient cycles and energy flows. Energy enters the system through photosynthesis and is incorporated into plant tissue. By feeding on plants and on one-another, animals play an important role ...

Ecosystem - Wikipedia

the ecosystem concept in natural resource management 2 Ecosystems and Their Services EXECUTIVE SUMMARY An ecosystem is a dynamic complex of plant, animal, and microorganism communities and the nonliving environment, interacting as a functional unit. Humans are an integral part of ecosystems. A well-defined ecosystem has strong interactions among its components and weak interactions across its boundaries.

2 Ecosystems and Their Services - Millennium Assessment

the ecosystem concept in natural resource management A digital ecosystem is a distributed, adaptive, open socio-technical system with properties of self-organisation, scalability and sustainability inspired from natural ecosystems. Digital ecosystem models are informed by knowledge of natural ecosystems, especially for aspects related to competition and collaboration among diverse entities.
