the ecozones of the world the ecological divisions of the geosphere 2nd edition The ecozones of Canada consist of fifteen terrestrial and five marine ecozones in Canada. These are further subdivided into 53 ecoprovinces, 194 ecoregions, and 1021 ecodistricts. An ecozone is a large sub-continental geographical division with distinct representative biotic and abiotic features in the ecological unit.

the ecozones of the world the ecological divisions of the geosphere 2nd edition A scientific model is a simplified abstract view of a complex reality. Scientific models are used as a basis for scientific work. They can be used to explain, predict, and test, or to develop computer programs or mathematical equations.. An example of a complex model is the software used for weather forecasts. The program is based on equations for the variables which affect weather.
